

CAE ICCU On-Site Seminars

CAE Healthcare offers a variety of bedside ultrasound training seminars designed to teach basic principles of the sonographic exam being used as an extension to the physical examination.

Seminars are addressed to physicians with or without prior ultrasound experience including intensivists, ER physicians, anesthesiologists, surgeons, cardiologists, nurse practitioners, etc. All seminars are provided by highly trained critical care physicians and certified sonographers.

On-site seminars can be given directly at your medical facility.

- Seminars and e-Learning are endorsed by the Université de Montréal, the American College of Chest Physicians (ACCP), the Canadian Critical Care Society (CCS), the American Society of Echocardiography (ASE) and the Critical Care Education Network (CRI).
- Seminars and e-Learning are recognized for CME credits by the Université de Montréal, the Royal College of Physicians and Surgeons of Canada and the American Medical Association.
- The e-Learning curriculum is required by the American College of Chest Physicians as a mandatory step in their critical care ultrasound certification program.
- Seminar content may be tailored to your institutional needs.

What is Required from You

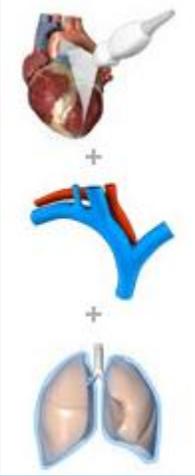

A minimum of 12 participants is required to schedule a seminar.

- The seminar is given directly in your medical facility or the location of your choice.
- Lead time to organize a course is 3 months.
- You are responsible for the following at your own expense:
 1. To find a room allocated for both didactic and practical sessions.
 2. Provide a digital projector and screen for the didactic session.
 3. Provide human models for the practical session.
 4. Provide stretchers or tables with mattresses for the models to lie down on.
 5. Organize meals and refreshments (if desired) for your group throughout the day.

Once a seminar is confirmed and booked, an event coordinator will contact you with the program breakdown and will guide you through the requirements.

e-Learning Curricula:

All seminars are offered with e-Learning curricula.

Benefits of combining seminars with e-Learning curriculum:

This solution provides the participant with a much more in-depth understanding and integration of the curriculum content to make the hands-on sessions and overall experience more valuable.

- As the participants will have reviewed the e-Learning curriculum prior to attending, seminars are highly-practical and consist of almost only hands-on time.
- Institutional license provides individual licenses for all participants at a reduced group price and allows the institution to access stats of all the participants: view scores, time taken to perform tests, areas where more work is needed, and other useful metrics.
- A free trial for each curriculum may be obtained at the following website: <https://caeiccu.com/lms>

The complete CAE ICCU e-Learning curriculum consists of 15.5 hours of cutting edge multimedia material and 800 interactive questions built to optimize learning.

It is divided into a cardiac curriculum "Focus Cardiac Ultrasound Study" and a non-cardiac curriculum "General Ultrasonography".

- The "Focus Cardiac Ultrasound Study", consists of 7.5 hours of material divided in 6 courses and 36 modules with more than 500 interactive questions built to optimize learning.
- The "General Ultrasonography", consists of a full curriculum on "Assessment of Central and Peripheral Vessels" focused on teaching the anatomy, DVT assessment, ultrasound guidance, etc. The course consists of 5.5 hours divided in 3 courses and 26 modules with more than 200 interactive questions built to optimize learning. It also includes the curriculum on "Assessment of the Pleural Space and Lung" that consists of 2.5 hours of multimedia material divided in 7 modules with 135 interactive questions.
- The e-Learning curriculum included with the seminar will depend on the type of seminar chosen.

1 Day Seminar Options and Registration Fees

(Pricing valid for North America only, please contact us for International pricing)

1 Day Seminar Program: Bedside Ultrasound in Critical Care		
1 Day Seminar Program: Focus Cardiac Ultrasound Study		
1 Day Seminar Program: General Ultrasound and guided Procedures		
Each seminar is combined with the related e-Learning curriculum package		
Number of Participants	Cost Breakdown (USD + taxes) per Participant	Total Cost (USD + taxes)
12+	\$550 for e-Learning	\$1,500 per participant
	\$950 for seminar
